Attorney Docket No.: BI-83-07

INFORMATION DISCLOSURE STATEMENT

Commissioner of Patents & Trademarks
Washington, D.C. 20231

Sir:

Submitted herewith are patents, publications or other information of which Applicant(s) are aware that may be material to the examination of this application and in respect of which there may be a duty to disclose in accordance with 37 CFR 1.56.

While this Information Disclosure Statement may be "material" pursuant to 37 CFR 1.56 it is not intended to constitute an admission that any patent, publication or other information referred to herein is "prior art" for this invention unless specifically designated as such.

In accordance with 37 CFR 1.97(b) the filing of this Information Disclosure Statement shall not be construed to mean that a search has been made or that no other material information as defined in 37 CFR 1.56(a) exists.

This information Disclosure Statement is being submitted within two months after receipt of the filing receipt (received 06/02/86) as suggested by 37 CFR 1.97.

A list of the patent(s) and/or publication(s) is set forth on the attached 6 page(s) of Form PTO-1449.

~~(Modified)~~. A copy of each of the items listed on PTO-1449 ~~(Modified)~~ is supplied herewith.

A concise explanation of the items listed on PTO 1449 ~~(Modified)~~ is given below.

Patent references AA - AD are discussed on pages 4-6 of the specification.

Reference AE is a copy of the news article referenced on page 1 of the specification. This article is not prior art, but is submitted for the purpose of providing a complete copy of the referenced article in the patent prosecution file.

References AF - A10 are news articles of which Applicant is aware that were published during 1983. These articles are all publications that occurred more than one year prior to the filing of this application, and as such comprise prior art. However, a careful reading of these articles reveals that Applicants' invention as claimed is not disclosed. What is disclosed is the concept of using a house arrest monitoring system and some early experimental attempts to use such a system (which attempts apparently resulted in failure). Very

few technical details are discussed in these articles..
Certainly, in Applicants' view, the features claimed with
respect to the tag of the present invention are not
disclosed nor even suggested by these publications.

Respectfully Submitted,

8-4-86
